

**AERIAL WORK PLATFORM** 

## **AT-157CG**

**Maximum working height** 17.7 m

**Maximum basket bottom height** 15.7 m

**Maximum working radius** 10.2 m

Maximum basket loading capacity 200 kg or two (2) persons

## MODEL: AT-157CG SPECIFICATIONS

MAX. BASKET BOTTOM HEIGHT	15.7 m	ſ	OUTRIGGERS	4 hydraulically operated outriggers.
BASKET EQUIPMENT				Each outrigger controlled simultaneously or
Basket	Pipe made			independently from rear side of carrier.
Inside dimensions	0.7 m x 1.2 m x 0.95 m (L x W x D)			Equipped with sight level gauge.
Capacity	200 kg or two (2) persons			Floats mounted integrally with the jacks and
Automatic leveling system	By hydraulic cylinders with link.			retract to within vehicle width.
Slewing angle	190° (Left 95°, Right 95°)			All cylinders fitted with pilot check valves.
BOOM	3-section full power synchronized telescoping		Fully extended width	3.3 m
	boom of box construction. The synchronization		SAFETY DEVICES	Automatic working area limiter (AMC)
	system consists of a double-acting hydraulic			Boom profile monitor system (Prevent hitting
	cylinder, an extension cable and a retraction			vehicle by boom and by basket, prevent hitting
	cable. Hydraulic cylinder fitted with a holding			basket by articulating boom)
	valve and a pilot check valve. And articulating			Automatic speed control system on boom
	boom of box construction. The articulation			elevation, slewing and articulating
	system consists of a double-acting cylinder with			<ul> <li>Automatic speed reduction and slow stop</li> </ul>
	holding valves and links.			function on boom elevation, slewing, telescoping
Fully retracted length	5.41 m + 3.05 m (Articulating)			and articulating
Fully extended length	11.93 m + 3.05 m (Articulating)			Automatic acceleration
Extension speed	6.52 m in 30 s			Boom vertical/horizontal movement device
Articurating speed	0° to 170° in 30 s			<ul> <li>Boom and basket automatic stowing</li> </ul>
ELEVATION	By a double-acting hydraulic cylinder, fitted			Emergency pump
	with a holding valve.			Emergency stop system
Elevation speed	-16° to 80° in 35 s			Parking brake warning
SLEWING	Hydraulic motor driven through worm reduction			<ul> <li>PTO connect warning (when drive)</li> </ul>
	gear. 360° continuous in either direction on ball			Jack interlock      Boom interlock      Outrigger
	bearing slew ring.			indicator • Hydraulic cylinder lock valves
Slewing speed	1.0 min <sup>-1</sup> {rpm}			Hydraulic safety valves      Level gauge      Guard
HYDRAULIC SYSTEM				for operation levers • Foot switch (on basket)
Pumps	Gear pump		ACCESSORIES	Hour meter      Rubber blocks (for outriggers)
Control valves	Multiple hydraulic-control valves actuated by			Chocks
	switch with integral relief valves, on slewing		OPTIONAL EQUIPMENT	Work light (on basket)      Safety belt
	frame. And electric remote control from basket.			Wood block (for outrigger)     Grease pump
Hydraulic oil tank capacity	Approx. 63 L	L		• Tools
Filter	Return line filter			

## WORKING RANGE

(mm)
