### **Tadano Ltd. Donates an All Terrain Crane to Support Reconstruction After the Turkey-Syria Earthquake**

Tadano Ltd. has decided to donate an all terrain crane manufactured by Tadano Ltd. to the Turkish government to help in the ongoing recovery and reconstruction efforts in the affected areas of the Turkey-Syria Earthquake. The crane will be delivered through ENKA Pazarlama Ihracat Ithalat A.Ş., a distributor of Tadano products and services based in Istanbul, Turkey.

The ATF50G-3 all terrain crane to be donated is our latest compact model and is capable of self-propelled operation even on severely rough roads in the disaster area. It is also a small, maneuverable type of crane, and we believe that this crane will make a wide contribution to the ongoing restoration and reconstruction of the affected areas.

Tadano Ltd. has built a close business relationship with Turkey over many years. We hope that our crane will help the local rehabilitation and reconstruction activities proceed quickly and safely.

#### **<The crane to be donated>**

All terrain crane "ATF50G-3"

Maximum lifting capacity : 50 tons

Maximum ground lift : 40.0 meters

Donation contact: ENKA Pazarlama Ihracat Ithalat A.Ş.
