Tadano Achieves B Score in CDP Climate Change Analysis

Tadano is pleased to announce that we have achieved a B score in the 2024 CDP Climate Change assessment, recognizing its outstanding efforts in climate change mitigation and information disclosure.

CDP, a UK-based non-governmental organization (NGO), has rated response levels to environmental issues by utilizing results of questionnaires received from companies, local authorities and other bodies around the world which has disclosed environmental information.

The organization has an eight-grade evaluation (A, A-, B, B-, C, C-, D, D-) for companies' environmental efforts, and a B, we have received this time, is the third highest.

We set long-term environmental targets for 2030 compared to the 2019 baseline of a 25% reduction in CO2 emissions from business activities, a 35% reduction in CO2 emissions from product use, and a 50% reduction in industrial waste emissions from business activities. As a leading company in the industry, we provide new value for customer's safety and global environment.

Under our corporate philosophy of "Creation, Contribution, and Cooperation," the Tadano Group strives to contribute to the preservation of the environment and the realization of a sustainable society through maximizing value to our

stakeholders and engaging in sustainable business activities. We aim to pursue further excellence for the world and the future.
